International Journal of Geographical Information Science

Taylor & Francis, London, Philadelphia

Volume 19 Number 1 January 2005

Research Articles

Event-oriented approaches to geographic phenomena
M. Worboys 1

Alternative representations of in-stream habitat: classification using remote sensing, hydraulic modeling, and fuzzy logic
C. J. Legleiter and M. F. Goodchild 29

A stochastic spatial decision support system based on PROMETHEE
O. Marinoni 51

Production of integrated digital terrain model from multiple datasets of different quality
T. Podobnikar 69

Prediction of *Anopheles minimus* habitat in India—a tool for malaria management
A. Srivastava, B. N. Nagpal, R. Saxena, V. Dev and S. K. Subbarao 91

Volume 19 Number 2 February 2005

Editorial

Introduction to the Special Issue on Spatial modeling to explore land use dynamics
Peter H. Verburg and A. Veldkamp 99

Research Articles

Exploring a spatio-dynamic neighbourhood-based model of residential behaviour in the Brussels periurban area
Geoffrey Caruso, Mark Rounsevell and George Cojocaru 103

Analysis of land use drivers at the watershed and household level: Linking two paradigms at the Philippine forest fringe
Koen P. Overmars and Peter H. Verburg 125

Path dependence and the validation of agent-based spatial models of land use
Daniel G. Brown, Scott Page, Rick Riolo, Moira Zellner and William Rand 153

Spatio-temporal dynamics in California's Central Valley: Empirical links to urban theory
Charles Dietzel, Martin Herold, Jeffrey J. Hemphill and Keith C. Clarke 175

Calibrating a neural network-based urban change model for two metropolitan areas of the Upper Midwest of the United States
Bryan C. Pijanowski, Snehal Pithadia, Bradley A. Shellito and Konstantinos Alexandridis 197

Analysis of scale dependencies in an urban land-use-change model
Claire A. Jantz and Scott J. Goetz 217

Comparison of the structure and accuracy of two land change models
Gil R. Pontius and Jeffrey Malanson 243

Volume 19 Number 3 March 2005

Research Articles

Sparse Grids: a new predictive modeling method for the analysis of geographic data
S. W. Laffan, O. M. Nielsen, H. Silcock and M. Hegland 267

Enabling collaborative geoinformation access and decision-making through a natural, multimodal interface
A. M. MacEachren, G. Cai, R. Sharma, I. Rauschert, I. Brewer, L. Bolelli, B. Shaparenko, S. Fuhrmann and H. Wang 293

Performance-improving techniques in web-based GIS
C. Yang, D. W. Wong, R. Yang, M. Kafatos and Q. Li 319

The application of GIS in the lands sector of a developing country: Challenges facing land administrators in Ghana
I. Karikari, J. Stillwell and S. Carver 343

Typhoon insurance pricing with spatial decision support tools
L. Li, J. Wang and C. Wang 363

Volume 19 Number 4 April 2005

Research Articles

Geographic Automata Systems
Paul M. Torrens and Itzhak Benenson 385

Colour-coded pixel-based highly interactive Web mapping for georeferenced data exploration
Haixia Zhao and Ben Shneiderman 413

Embedding landscape processes into triangulated terrain models
Enrique R. Vivoni, Vanessa Teles, Valeriy Y. Ivanov, Rafael L. Bras and Dara Entekhabi 429

A proposed framework for feature-level geospatial data sharing: a case study for transportation network data
Z.-R. Peng 459

An environmental decision-support system for the management of water pollution in a tidal river network
Y. Leung, Y. Lee, K. C. Lam, K. Lin and F.-T. Zeng 483

Volume 19 Number 5 May 2005

Review Article

Ontological considerations in GIScience
P. Agarwal 501

Research Articles

An algebraic approach to automated geospatial information fusion
M. Duckham and M. Worboys 537

Dynamic environmental modelling in GIS: 1. Modelling in three spatial dimensions
D. Karssenberg and K. De Jong 559

Integration of genetic algorithms and GIS for optimal location search
X. Li and A. G.-O. Yeh 581

Representing and reducing error in natural-resource classification using model combination
Z. Huang and B. Lees 603

Volume 19 Number 6 July 2005

Research Articles

Dynamic environmental modelling in GIS: 2. Modelling error propagation
D. Karssenberg and K. De Jong 623

Discovering relative motion patterns in groups of moving point objects
P. Laube, S. Imfeld and R. Weibel 639

Technological aspects of a full 3D cadastral registration
J. E. Stoter and P. J. M. van Oosterom 669

Possibilities and limits of prospective GIS land cover modelling-a compared case study: Garrotxes (France) and Alta Alpujarra Granadina (Spain)
M. Paegelow and M. T. Camacho Olmedo 697

The technique of distance decayed visibility for forest landscape visualization
C. Kumsap, F. Borne and D. Moss 723

Erratum 745

Volume 19 Number 7 August 2005

Research Articles

Connecting historical and contemporary small-area geography in Britain: The creation of digital boundary data for 1971 and 1981 census units
Nigel Walford 749

Further developments of a fuzzy set map comparison approach
Alex Hagen-Zanker, Bas Straatman and Inge Uljee 769

Comparison of land cover maps using fuzzy agreement
S. Fritz and L. See 787

RUSLE applied in a GIS framework: Calculating the LS factor and deriving homogeneous patches for estimating soil loss
Laurence A. Lewis, Gert Verstraeten and Honglei Zhu 809

Using uncertain conceptual spaces to translate between land cover categories
O. Ahlqvist 831

Volume 19 Number 8-9 September–October 2005

Special Issue: Generalisation

Guest Editors: Christopher B. Jones and J. Mark Ware

Guest Editorial

Map generalization in the Web age
Christopher B. Jones and J. Mark Ware 859

Research Articles

Optimization approaches for generalization and data abstraction
M. Sester 871

Amalgamation in cartographic generalization using Kohonen's feature nets
M. K. Allouche and B. Moulin 899

Building displacement over a ductile truss
Matthias Bader, Mathieu Barrault and Robert Weibel 915

Cartographic generalization of roads in a local and adaptive approach: A knowledge acquistion problem
S. Mustiere 937

Real-time generalization of XML-encoded spatial data for the Web and mobile devices
L. Lehto and L. T. Sarjakoski 957

Scale-spaces for generalization of 3D buildings
H. Mayer 975

Volume 19 Number 10 November 2005

Research Articles

A framework to enhance semantic flexibility for analysis of distributed phenomena
J. McIntosh and M. Yuan 999

An integrated TIN and Grid method for constructing multi-resolution digital terrain models
B. Yang, W. Shi and Q. Li 1019

A combinatorial data model for representing topological relations among 3D geographical features in micro-spatial environments
J. Lee and M.-P. Kwan 1039

An application of problem and product ontologies for the revision of beach nourishments
D. Van de Vlag, B. Vasseur, A. Stein and R. Jeansoulin 1057

Implementing a new data model for simulating processes
F. Reitsma and J. Albrecht 1073

Query processing in spatial databases containing obstacles
Jun Zhang, Dimitris Papadias, Kyriakos Mouratidis and Manli Zhu 1091

Towards a potential research agenda to guide the implementation of Spatial Data Infrastructures—A case study from India
Y. Georgiadou, S. Puri and S. Sahay 1113

Marine GIS: Identification of mesoscale oceanic thermal fronts
V. D. Valavanis, I. Katara and A. Palialexis 1131

GIS-based route planning in landslide-prone areas
A. K. Saha, M. K. Arora, R. P. Gupta, M. L. Virdi and E. Csaplovics 1149

Acknowledgements
Peter Fisher 1177

Book review 1183
